

CLAIMS

What is claimed as being new and desired to be protected by LETTERS PATENT of the United States is as follows:

1. A portable beverage holder apparatus, comprising:
 - clamping means,
 - a hanger member,
 - clamp-to-hanger hinge means connected between said clamping means and said hanger member,
 - a cup unit, and
 - hanger-to-cup hinge means connected between said hanger member and said cup unit.
2. The apparatus of claim 1 wherein said clamping means include a spring clamp assembly.
3. The apparatus of claim 2 wherein said spring clamp assembly includes:
 - grasping portions,
 - clamping portions, and
 - a spring for urging said clamping portions towards each other.

4. The apparatus of claim 1 wherein said clamp-to-hanger hinge means include a clamp-to-hanger hinge assembly.

5. The apparatus of claim 4 wherein said clamp-to-hanger hinge assembly includes:

a top hanger reception channel in said clamp assembly, and
a top hanger portion in said hanger member, wherein said top hanger portion is received in said top hanger reception channel.

6. The apparatus of claim 1 wherein said hanger-to-cup hinge means include a hanger-to-cup hinge assembly.

7. The apparatus of claim 6 wherein said hanger-to-cup hinge assembly includes:

hanger, free-end portions, and
hanger-reception channels in said cup unit, wherein said hanger, free-end portions are received in said hanger-reception channels.

8. The apparatus of claim 7 wherein said hanger-to-cup hinge means further include:

outside washers between outside portions of said hanger, free-end portions and said cup unit, and
inside washers between inside portions of said hanger, free-end portions and said cup unit.
